

Tipping Bale Handler

The **Tipping Bale Handler** is a time proven concept which was developed by *Cashels* over 35 years ago to assist local farmers who required a solution for transporting wrapped bales of silage. The design incorporates a trip latch, allowing the user to tip wrapped bales of silage on their ends without causing any damage. Developed for use on 3-Point tractor linkage.

Length	Width	Height	Linkage	Load Capacity	Net Weight	Tractor HP
1535mm (60")	1155mm (45")	870mm (34")	CAT 1 & 2	1 Bale 1000kg (2200lbs)	110kg (242lbs)	60+

Bale Spike

The **Bale Spike** from *Cashels* is a very affordable option for transporting unwrapped bales from the field to the wrapping area. The Bale Spike is also used for handling/transporting round and square bales of hay and straw from the field during feeding season. Suitable for use on 3-Point linkage systems and tractor front loaders.

Length	Width	Height	Linkage	Load Capacity	Net Weight	Tractor HP
1135mm (45")	1370mm (53")	890mm (35")	CAT 1 & 2	1 Bale 1000kg (2200lbs)	95kg (209lbs)	60+
